### **DETAILED ACTION**

This application is a continuation in part of 09/209952 which is a continuation in part of 09/189166 which is a continuation in part of 09/129253.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 17-31, and 47-96 drawn to methods for diminishing, inhibiting, or eliminating addiction of drugs or abuse in a mammal comprising the nutrient ingredient specified herein, classified in class 514, subclass 553, 554, and 561 for example.
- II. Claims 32-46 drawn to drawn to a method for diminishing, inhibiting, or eliminating rewarding/incentive effects in a mammal comprising the nutrient ingredient specified herein, classified in class 514, subclass 553, 554, and 561 for example.

Group I and II are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are separate and distinct each from the other since the invention Group I functions to diminish, inhibit, or eliminate addiction of drugs or abuse in a mammal comprising the nutrient ingredient specified herein and the invention of Group II functions to diminish, inhibit, or eliminate rewarding/incentive

Art Unit: 1617

effects in a mammal. Therefore, Group I and Group II have different functions and different modes of operation.

Each method of treatment relates to a separate and distinct area of pharmaceutical technology. The search for all inventions would place an undue burden on the examiner in view of the diversity of the medical disorders to be treated and the corresponding diversity in the field of search for each.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P Sec. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Jiang, Ph.D. whose telephone number is (703)305-1008. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.
